Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-11 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 3 teach "selected from the class including" which is improper Markush terminology, since such selection could be made from compounds which are not listed within the groups. Proper Markush terminology is "selected from the group consisting of" or other similar language (see MPEP 2173.05 (h)).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harmon (4659486).

Harmon teaches an invert emulsion drilling fluid which comprises an emulsifying agent within the scope of the present invention (see abstract and column 3, lines 16-32). Harmon teaches that carbon black may be employed as a fluid loss agent in the drilling fluid, within the percentages taught herein (column 3, lines 50-64). Harmon differs from the present invention in that a specific example of the use of carbon black as a fluid loss agent is not disclosed, nor the size of the particles. It would be obvious to one of ordinary skill in the art to use carbon black particles in the invert emulsion of Harmon, given the teaching of Harmon that such carbon black is useful for the reduction of fluid loss therein. The variation of the particle sizes of the carbon black in order to optimize the plugging of the formation, to prevent fluid loss, would be an obvious variation to one of ordinary skill in the art.
